

Constraint-Induced Interface Realism (CIIR)

Ontological-Epistemic Architecture

- Complete separable metric
 - Borel σ -algebra
- Independent of observer
- Riemannian (M, g)
 - Curvature $\kappa \geq 0$
- Constraint $\hat{c} \in C^\infty(M)$
- Completely positive
- Trace preserving
- Information-limiting
- Separable Hilbert space
 - Density operators ρ
 - Born rule emerges
- C^* -algebra
 - Self-adjoint operators
 - Spectral theorem
