

Topological Manifold of Informational Filtering

$$\pi: (\mathcal{R}, d_{\mathcal{R}}) \rightarrow (\mathcal{M}, g) \rightarrow \mathfrak{D}(\mathcal{H})$$

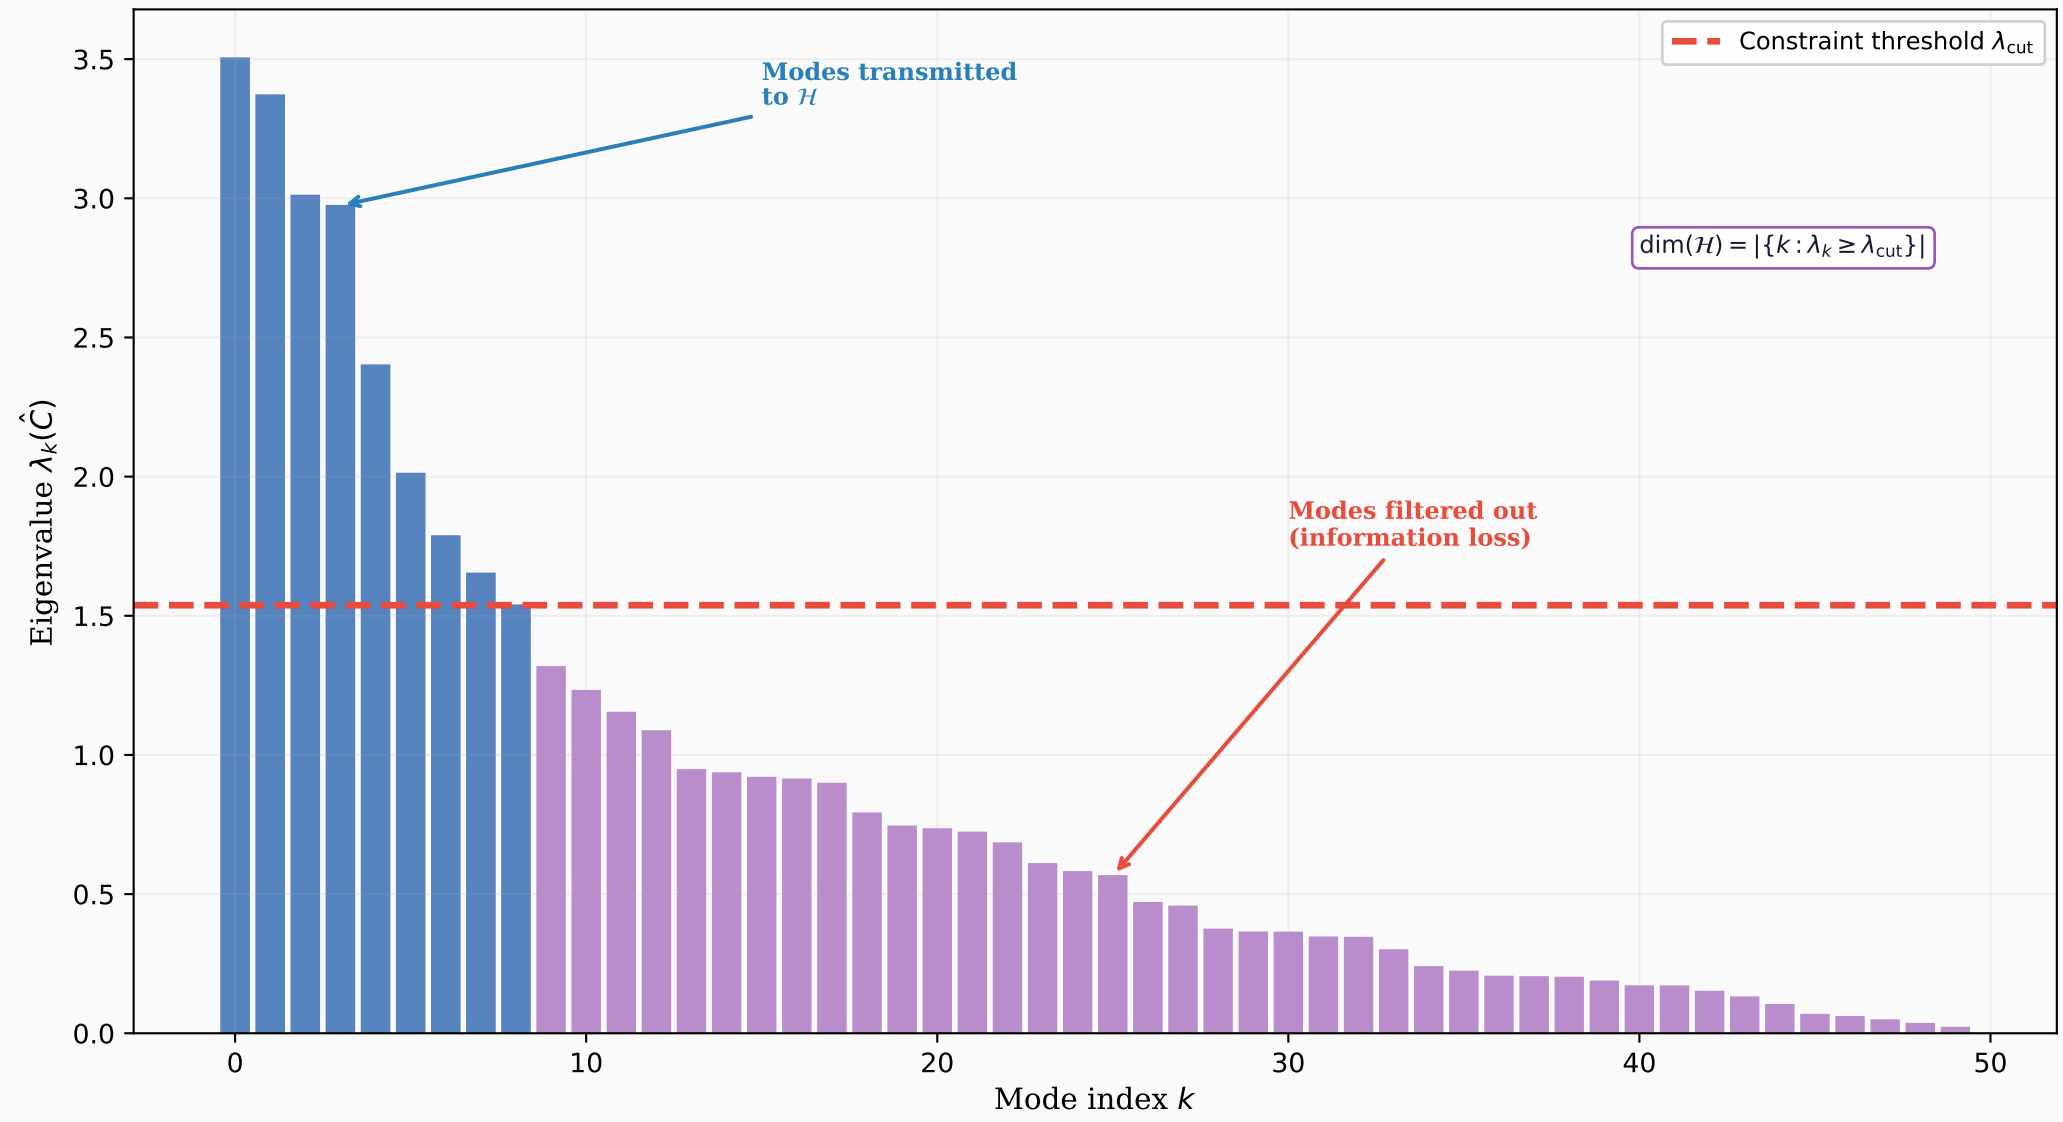

(a) Fiber Bundle: $\pi: \mathcal{R} \rightarrow \mathcal{M}$
Vertical fibers = unobservable gauge orbits

(b) Informational Filtering: Dimensional Collapse

(c) Constraint Spectrum: $\hat{C}$ Eigenvalues

(d) Projection: $\Phi: \mathcal{R} \rightarrow \mathcal{B}(\mathcal{H}_{\mathcal{M}})$
Topological complexity collapse
